P. J. MULLANEY,
FRT. TRAFFIC MGR.

S. E. MILLER,
ASS'T. GEN. MGR.

MAY 1st, 1935

(SUBJECT TO CHANGE WITHOUT NOTICE)

RECEIVED
JAN 28 1935

TO SHIPPERS AND RECEIVERS:

The Boston and Maine Railroad is using every means at its disposal to fully meet the transportation requirements of the industries it serves.

Recognizing the demand for fast and dependable service from New England to the markets of the Country, we have extended and improved our through merchandise car service, and will continue to make further improvements as the need arises.

It is our desire to cooperate in every possible way with the New England industry, and we shall welcome suggestions for further development of our service.

P. J. MULLANEY,
Freight Traffic Manager

Where service shows car would arrive on Sunday, it is understood Monday delivery is indicated.

Agents will make no change in their line up without approval of Asst. General Manager.

AUXILIARY MOTOR TRUCK service in co-ordination with regularly scheduled rail movement has resulted in the speeding up of less than carload freight.

TRUCKS leave the several concentration points in the morning with freight which has arrived in transfer cars during the previous night. In the return direction freight shipped from stations on the truck routes is forwarded from the concentration points the same day in through package cars to New England, western and southern points.

DOOR-TO-DOOR SERVICE on shipments of less than carload merchandise between many important cities and towns on and off the lines of the Boston and Maine Railroad is now being provided, in many cases at no extra charge above the regularly established freight rate. Our representatives will gladly furnish full information about this service upon request.

FREIGHT TERMINAL. The new classification yards of the Boston and Maine Railroad at Boston have a handling capacity of 2,000,000 cars per year.

These yards, together with the facilities which they serve, are conveniently located to the market and business districts of the city.

A modern Fruit Terminal, with extensive house and team delivery tracks, and with a holding yard of 600 car capacity; grape yards, with a capacity of 100 cars, and with covered platforms for display purposes; modern crane equipment for the loading and unloading of heavy bulk freight; ample warehouse space; and consolidated freight house facilities for the concentration and handling of less than carload merchandise, are among the more important facilities offered.

WHARVES. The Boston and Maine R. R., through the Mystic Terminal Co., owns and operates 10 ocean piers accommodating 13 steamers at one time. All piers have direct rail and steamship connections. Lighterage is unnecessary.

GRAIN ELEVATORS. Capacity of this Company's grain elevators at Boston approximately 1,500,000 bushels.

COAL PLANT. Six towers enabling the handling of approximately 7,500 tons in 8 hours from vessel to cars.
